

# Balance Your Immune System With EPICOR®

**No Fillers**

Healthy Origins® EpiCor® is an all-natural nutritional dietary health supplement that helps support the immune system. An intricate, body-wide network of cells, chemicals and organs, your immune system is what keeps you well so you can work and play! EpiCor® is a complex nutrient-rich ingredient comprised of fiber, proteins, vitamins, minerals, amino acids, antioxidants, and other metabolites. Clinical studies have found EpiCor's immune-balancing properties provide year-round support by helping the body boost or suppress immune response as needed.\*

Unfortunately, anything that stresses you may wreak havoc on your immune health. When you're stressed your immune system is out of balance, which can result in a host of health issues. EpiCor® is clinically shown to be a safe and effective way to help support immune response for improved year round health and wellness.\*

EpiCor® does more than just stimulate or "boost" the body's immune system, it balances it. EpiCor® supports the body at the first level of immune defense, the innate immune system ( or mucosal barrier), EpiCor® helps activate Natural Killer (NK) cells, an integral part of immune defense.\*

Research shows that EpiCor® also works further down the line when the adaptive immune system kicks in by activating B cells, which support antibody production. EpiCor® also contains antioxidants that further support a healthy body by scavenging dangerous free radicals.\*

- **EpiCor® is 100% Natural, high-metabolite immunogen\***
- **Starts working in 2 hours\***
- **Activates Natural Killer (NK) Cells\***
