The blue-green algae Spirulina is a nutrient rich superfood. With over 60% protein content, Spirulina is one of the highest, most digestible sources of “complete” protein. Spirulina is also a great source of several important phytonutrients like Carotenoids; Essential Fatty Acids like Gamma Linolenic Acid; trace minerals such as Iron, Magnesium, Calcium; Sulpholipids and the antioxidant enzyme Superoxide dismutase (SOD) all of which are in a bioavailable form.

This ability of being easily digested and assimilated is due to Spirulina’s lack of a cellulose cell wall. Most remarkably Spirulina is one if the highest natural sources for phytopigments like Phycocyanin, Beta-carotene, Zeaxanthin and other plant pigments that define green foods like Chlorophyll. *

100 % Natural with no other ingredients, fillers or binders.

Suitable for vegetarians and vegans

Kosher certified

Organic certified

Available in 30, 180, 360 and 720 tablet bottles
